fastpoint⁹TM

SecuriSPOT allows the automatic detection of risks to people's safety and the triggering of alerts in real time

*PPE : Personal Protective Equipment

AVANTAGES

- The solution is **robust & self-contained**: weatherproof hardened metal housing and the ability to operate in any environment even without internet and electrical connection.
- The solution is **flexible and scalable**: the areas to be monitored and the safety rules to be respected can be configured in real time and in the field.
- **Easy to use**: the configuration of the security parameters is done on a tablet via an intuitive graphic interface accessible to all.
- **Performance and historization**: each SecuriSPOT unit can monitor an area of several dozen metres in diameter, and can record all events on a secure server.

Ensuring optimum safety for all employees and preventing accidents at work is our daily challenge.
