

Collision  
avoidance  
by virtual  
zoning

# SecuriSHOCK<sup>TM</sup>

High-precision assisted handling  
in demanding environments

MADE IN FRANCE

SecuriSHOCK makes it possible to create a virtual perimeter security envelope around each object, thanks to the use of Computervision and stereoscopy technologies.

## BENEFITS

- Virtual anti-collision zoning system to secure all handling critical operations
- Real-time millimetre precision for moving loads
- The solution is directly integrated into the lifting and handling system
- The prevention of collision risks is done in real time thanks to the emergency stop

*Secure your sensitive handling operations thanks to our rugged Computervision solutions*
