**fastpoint**™

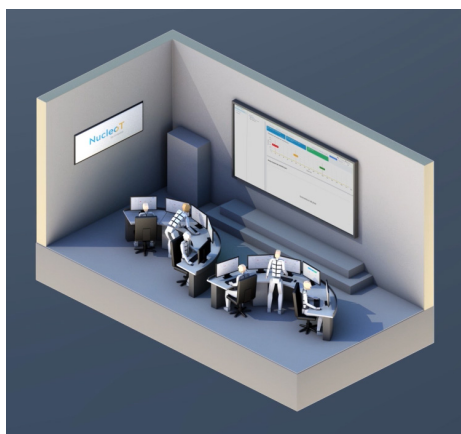

NucleoT ensures transparent data management in confined areas, including the collection, security and analysis of all your data, as well as the visualization of critical KPI dashboards

Data collection

Data aggregation

Data monitoring

Data analysis

## BENEFITS

- A unique platform to help data collection in confined areas, regardless of the constraints specific to each environment.
- A complete management of the data chain, from collection to monitoring.
- An ultimate customization flexibility that allows you to monitor critical KPIs specific to your business in real time.
- An advanced security of all your data thanks to our real-time backup architecture in a private cloud.

With NucleoT, control all your business processes thanks to real-time management of all the data even in the most restrictive environments.
